### Miette takes flight Anne Cortey & Herbéra

Miette and her little brother live happily in a nourishing garden of a thousand colors, attentive to every last slug who comes to sample what they produce. The closeness of their bond is unequalled, and their home a little paradise. On a day of strong winds, Miette is whisked off, but luckily, the Stork lends a helping wing and brings her back home. Another day, caught off-guard by a gust, Miette is swept far away. Her heart filled with sadness, she surrenders to the wind. An unexpected coming-of-age odyssey ensues.

A book of lively colors, bursting with watercolor landscapes through which India-ink characters wander at the whim of gifted illustrator Herbéra. ### Droplet Pascale Breyse

Over the course of this book, author and illustrator Pascale Breyse lends voice to a drop of water. A tiny droplet that lives in the ocean depths, among clouds in the middle of the sky. A droplet that travels through nature, animals, and the human body—it's positively everywhere! Readers will bear witness to an incredible journey reminiscent of a rite of passage, rich in encounters and discoveries, from the creation of the world to the birth and evolution of human beings, by way of daily existence.

Droplet was conceived from a desire to spotlight the interdependence among species and highlight the wealth and diversity of living things. Through compositions in felt-tip marker and colored pencils, combining wallpaper and cut-outs, Pascale Breyse makes readers young and old alike more mindful of their environment.

### A Dog in Winter by Alice Brière-Haquet & Csil

When is the weather too rotten to let your dog go out? Not rain nor wind nor hail can stop the canine hero of this book from trailing his good humor and long floppy ears across these pages. The words tag along on his meteorological adventures. For although happiness often looks sky blue, it also goes well with snow white or a muddy brown. The way we perceive animals has evolved... but not the way we speak of them. This imprint sets out to confront these clichés by taking a sidestep on the level of story—we hear animals' voices—and art, with Csil's madly stylish and nimbly zany engravings.

## Staring Into Space by Claire Garralon

In March 2020, Claire Garralon developed a ritual for quarantine: drawing the portrait of a primate every day, like a daily photo, their eyes highlighting the fragility of a not-always-flattering moment of frozen expression.

Naturally, she began wanting to make them speak. To give them a voice, ask them questions as if they were people, animate them like creatures of flesh and blood with hearts and souls.

She imagined that these primates were living either among us or in a make-believe land, and that someone -an anthropologist, perhaps- came to see them and ask a single question key to the period we are all living through: What does happiness mean to you?

### Don't fall! Annie Agopian & Audrey Calleja

*The children play at not falling*

They pretend to be grown-ups, then babies. The playground is full of surprises: here, a crocodile; there, a treasure chest. My favorite blanket becomes a cape that becomes a flag which then becomes a red carpet spreading out towards my future. I don't know where this carpet will take me but someone laid it out for me, so I keep walking.

A book about the power of child's play, that magical realm which contains everything: the future and the past, fantasies and fears.

# A pas de loups

Founded in 2014, A Pas de Loups specializes in picture books and currently has 80 titles in its catalog. This young publishing house was named after a French expression: "Marcher à pas de loup" which means walking silently, as wolves would. Wolves can be still, but they can also howl. Similarly, our catalog oscillates: tender stories and dreamy wordless leporellos on one side; colorful art books, loud bestiaries, and roaringly funny alphabet books on the other. Since 2016, we have completed our offer with a collection of short illustrated novels for children who are just starting to read.
